LA FRENCH TECH · LOIRE VALLEY
Sensivic, designer and publisher of real-time smart audio detection solutions.

Sensivic has designed a smart audio detection system via an immediate predictive model that alerts a security system in real time when an unexpected sound event occurs. The technology is based on an artificial intelligence engine that continuously adapts to the ambient soundscape and detect sound anomalies in a naturally noisy environment: artificial intelligence, machine learning, edge computing.
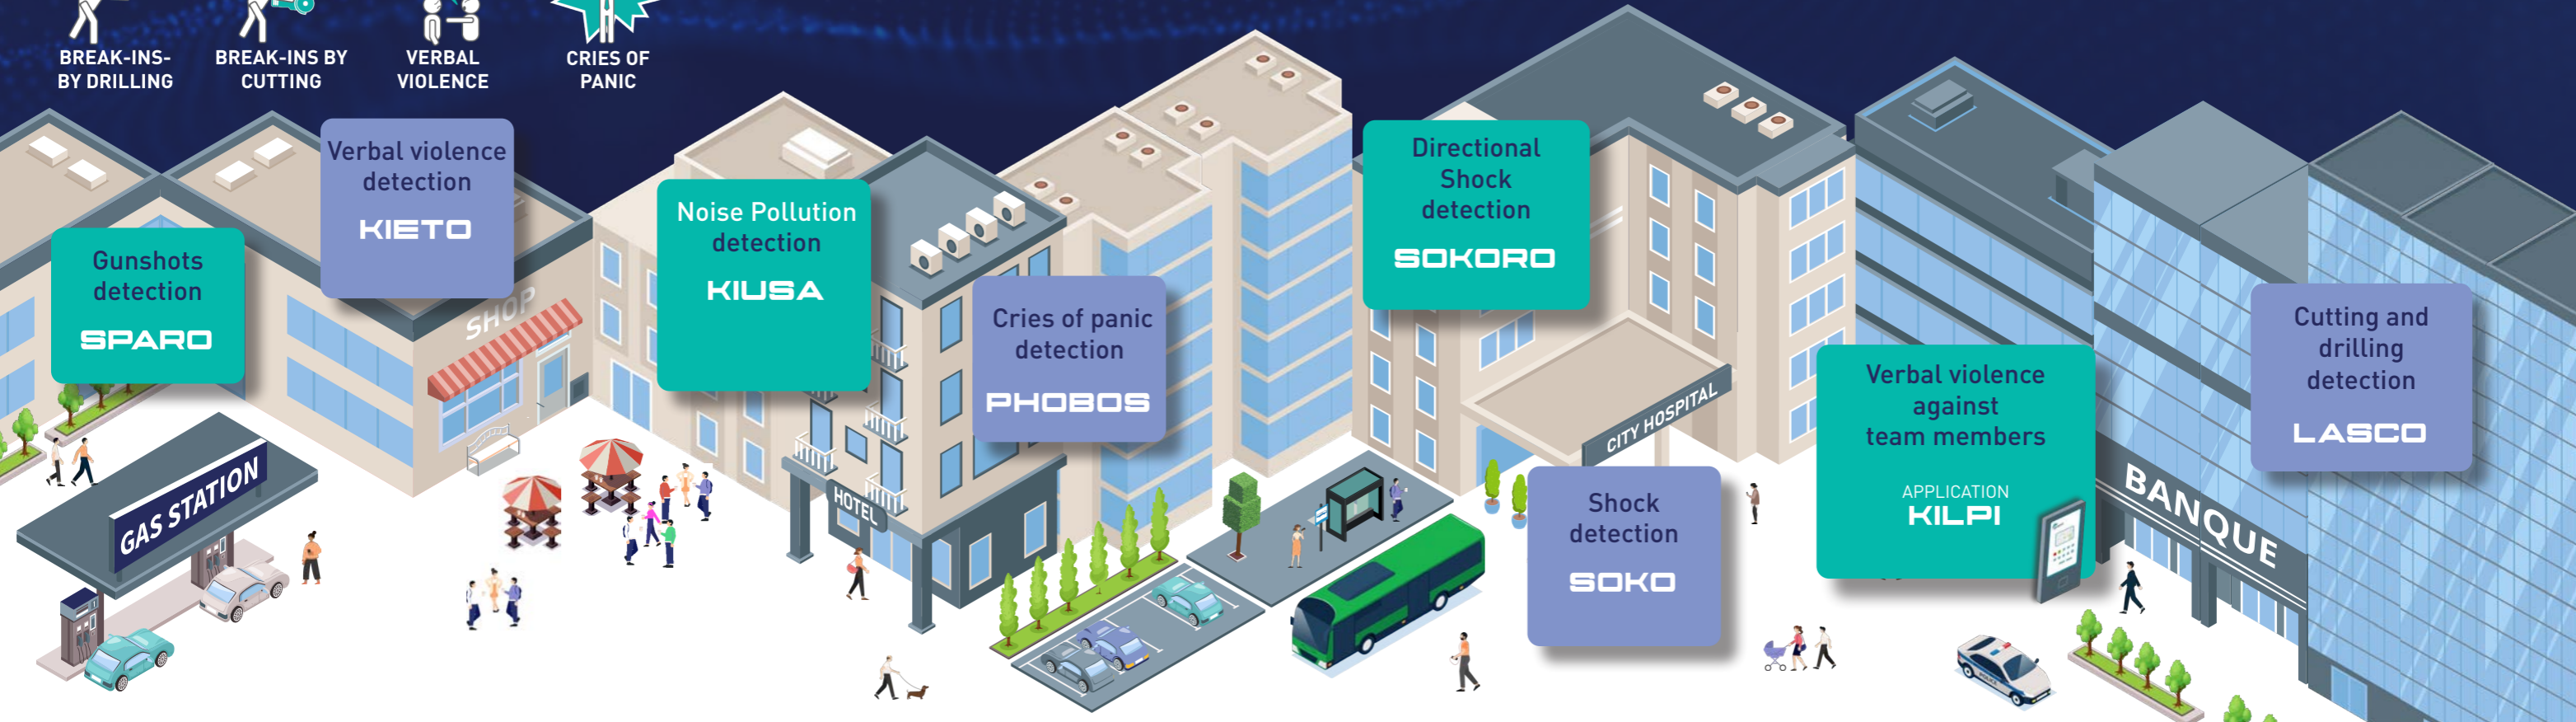

1. Continous machine-learning of the Soundscape

2. Automatic qualified detection of unexpected sounds

3. Real-time notification

SENSIVIC ®
Real-time Smart Audio Detection

Smart audio solutions available for various types of operating systems and implementations :

Detectors
Plug & Play standalone solutions for integrating security and cctv systems.

Application
Downloadable to smartphones and tablets to protect mobile teams from verbal violence.

OEM / Firmware
Standalone smart audio detections for integrating to third part systems.

A full range of indoor and outdoor smart audio detectors that alert to threatening situations

- EXPLOSIONS
- GUNSHOTS
- GLASS BREAKAGE
- VANDALISM
- CAR ACCIDENT
- RAM RAIDS
- NOISE POLLUTION

- BREAK-INS-BY DRILLING
- BREAK-INS BY CUTTING
- VERBAL VIOLENCE
- CRIES OF PANIC

Smart audio detection, a technological building block that improves the performance of security systems.

- Automatic detection at 360°, 24/7
- Qualified real-time alerts
- Synchronised rotation of PT cameras
- Optimisation of security protocols
- Precious time saving
- Attention drawing
